

Graduate Job Description

To train as a setting out engineer with J Breheny Contractors you will need an HND or Degree in Civil Engineering. You will be placed with a senior engineer who will mentor/train you, to set out roads, sewers, buildings, structures and services. You will learn how to use our Trimble robotic equipment and to upload and download information from your computer to a hand held controller.

You will learn how to read drawings and produce "as-built" drawings from survey information recorded by yourself. From these surveys you will also learn how to calculate areas and volumes required for the works.

As a trainee engineer, you will be working outdoors for the majority of the time and on occasions, this will require working in adverse weather conditions. You will be required to wear Personnel Protection Equipment (PPE) at all times when on site and adhere to the site rules.

Previous site experience would be an advantage but is not a requirement.
